Abstract: *This in the article of horses digestion to do diseases, their causes, symptoms and treatment methods about in detail information Colic, gastritis, stomach ulcers, intestines parasites and stomach ache such as of diseases etiology and clinical appearances analysis This is also of diseases prevent to take according to important recommendations given. Article horses health save them food in order attention to give and preventive measures done increase according to useful information own inside This research horse breeders, veterinarians and horse to care interested parties for important source become service does.*

Key words: *Horses digestion to do system, colic, gastritis, stomach ulcer, intestine parasites, stomach ache, veterinarian medicine, horse diseases, nutrition order, parasites against drugs, gastrointestinal tract disorder, prevention, food digestion to do problems, horses health, pasture hygiene.*

Introduction. Horses healthy and far life vision for their digestion to do system correct performance important importance has. Of horses food digestion to do system sensitive is wrong nutrition, parasites, stress and other factors under the influence different to diseases exposed to be possible.

Of horses digestion to do diseases inside the most wide widespread colic, gastritis, stomach ulcers, parasites are, they are on horses pain, appetite loss, feces disorders and even life for dangerous was complications brought release possible. Many in cases this diseases wrong nutrition, enough in quantity water not drinking or stable conditions badness because of to the surface comes . Below this diseases

and their causes, symptoms and treatment methods about green information I will give .

1. Colic of horses the most dangerous and wide widespread digestion to do This is a stomach disease . intestine in the tract gas assembly , bowel eclipse or other reasons because of to the surface is coming .

Of the disease main reasons wrong food that is excess grain products , rotten or cold feed consumption dehydration , parasites , overeating outside physical tension or stress possible .

This disease to the signs and restlessness , front legs with land digging , a lot sweating , heart of the beat acceleration , lying down to take or back looking at belly side bite , food give up delay or inside absence (Figure 1).

Colic treatment for veterinarian to the instruction according to medicines and inside opener from tools use , heavy in cases surgery practice transfer necessary .

Picture 1 : On horses colic on time observable clinical characters .

2. Gastritis and stomach wounds disease on horses wrong food or due to stress to the surface arrival possible .

To the disease reason acidity level increase , excess outside many cereals consumption to do , stress and far term without food stay reason will be .

In horses your appetite decrease or loss , belly pain and appetite violation , initially pale then hardened stool , heavy in cases stomach ache and vomiting main signs is considered .

Gastritis treatment for acid reducing medicines , special diet : more hay and less cereal foods to give , stress reduce advice is given .

3. Intestine Parasites (worms) of the horse from food use to take ability reduces , this and weight loss and general of health to deteriorate take is coming .

Reason the horse bad satire under the circumstances and outside in the pasture feeding and new horses when entered quarantine to the rules compliance not to do .

In horses intestine parasites if this characters manifestation will be : weight loss , gloss decreased feathers , inside departure or inside not coming , stomach ache .

This disease treatment for to vomit against drugs (antiparasitic) (means) to give , pastures and stables clean storage need .

4. Tympania that is stomach rest . This is in the stomach or in the intestines gas meeting as a result to the surface is coming .

To the disease many in quantity new grass or cereals consumption fermentation process disorder , eating order change reason will be .

Disease belly swelling and horse himself discomfort , shortness of breath to take difficulty , discomfort and belly side kick through manifestation will be .

The disease in the fight belly massage and light walking , heavy in cases gas release for probe is applied .

Timpani prevent It is also possible to get . for balanced food in order compliance to do , clean drink water enough in quantity to be , pasture and stable

hygiene attention to give , horses regular veterinarian from the inspection transfer necessary .

Conclusion: Horses digestion to do system sensitive is wrong nutrition , hygiene to the rules compliance not to do and as a result of stress different to diseases exposed to be Possible . Colic , gastritis , stomach ulcer , intestine parasites and stomach ache horses between wide widespread problems is , their prevent to take for balanced food , clean drink water and regular veterinarian control necessary . Diseases early to be determined and fast treatment measures of horses healthy and far life to see provides . Therefore for horse owners and care those who do this to issues separately attention give necessary .
