Abstract: *the use of pedagogical technologies in teaching English has become an integral part of the modern educational process. Today, the use of innovative approaches and modern technologies in the field of Education makes it possible to make the educational process more effective and interesting. Pedagogical technologies allow teachers to improve the learning process of students, increase their interest and raise the level of their assimilation.*

Keywords: *English, teaching methodology, pedagogical technologies, lessons , interactive programs, video materials.*

The application of pedagogical technologies in the teaching of the English language provides for the active participation of students. With interactive lessons, multimedia materials, online platforms and mobile applications, students can actively participate in the lesson. This increases their interest in learning and facilitates the process of language acquisition. Students, with the help of state-of-the-art technology, will have the opportunity to self-educate, which will help them gain knowledge independently. In addition, pedagogical technologies allow teachers to conduct the lesson more interesting and effective. For example, through interactive presentations, video materials, audio textbooks, and many other resources, teachers can further revitalize the lesson. These techniques play an

important role in attracting students ' attention and increasing their interest in the learning process.[1]

The use of pedagogical technologies in teaching English also helps to develop the communicative skills of students. Teachers can use online communication platforms to encourage students to interact with each other. This increases their ability to communicate in English and allows for the use of language in practice. Students interact through a variety of tasks and project work that develops their teamwork skills. In addition, with the help of pedagogical technologies, teachers will be able to assess and analyze the level of knowledge of students. Through online tests, interactive games, and other assessment tools, teachers can quickly and efficiently determine the level of student acquisition. This allows teachers to further improve the learning process and adapt it to the needs of the students. The application of pedagogical technologies in teaching English also helps to develop students ' creativity skills. Students will have the opportunity to express their creative thoughts through various projects and tasks. This increases their self-expression skills and develops thinking skills in English. Modern pedagogical technologies also give teachers the opportunity to update and develop their knowledge. Through online courses, webinars and other educational resources, teachers can learn new methodologies and improve their skills. This promotes professional development and improves the quality of Education. The use of pedagogical technologies in teaching English also provides for individualization of the educational process. Students will have the opportunity to study to suit their abilities and needs. This makes it possible to increase their level of mastery and make the reading process more efficient. Teachers can plan and conduct classes, taking into account the individual needs of each student. Also, with the help of pedagogical technologies, teachers help to increase the motivation of students. Students, with interactive lessons and modern technology, feel the learning process

as fun and exciting. This increases their interest in learning and makes the learning process more efficient.[2]

The use of pedagogical technologies in teaching English also helps to develop the social skills of students. Students interact through group work and collaborative activities that enhance their social skills. Teachers can achieve effective results through the use of pedagogical technologies in the development of students ' social skills.[3]

Conclusion:

In conclusion, the use of pedagogical technologies in teaching English makes it possible to make the educational process more effective and interesting. With the help of modern technologies, teachers can improve the learning process of students, increase their interest and increase the level of assimilation. This facilitates the process of students mastering the English language and sets the stage for their future success.
