Introduction - Neighborhood System not only social cooperation and solidarity strengthening , maybe society economic stability also important for institute as confession This is the system development , its economic the basics improvement issues not only Uzbekistan , maybe world also relevant in scale from problems one as The neighborhood system is under consideration . through local in the economy resources effective management , entrepreneurship encouragement and the population economic in terms of support opportunities expansion possible . Research this shows that the neighborhoods economic activity develop for financial independence level increase , state and private sector between cooperation expansion important importance profession In particular , the mahalla budget in formation innovative financial from mechanisms use and private investments attraction to do efficiency increase main from the roads is one . With this together , international experience analysis to do this shows that local management organs digital technologies with provide and from them use expansion economic processes further effective management opportunity Research within the framework of the local economy according to there is scientific developments , including economic resources diversification to do , the population economic activity increase and state by subsidy separation issues are also studied . In this way, the neighborhood system economic potential increase , its functional opportunities expansion and society socio-economic stability in providing modern approaches place analysis will be done .

Literature review Mahalla system of activity economic the basics improvement in the matter of one row scientists and experts valuable scientific research take In

particular , Amartya Sen in his work " Development as Freedom" economic development human freedoms expansion process as to understand offer does . His in my opinion , economic development main purpose – society members social and economic opportunities This view is expansion . from the perspective of neighborhood systems society the most important from the elements one as economic to progress contribution addition possible . Also , its views based on the local economy reinforcement for education , health storage , financial to resources entrance opportunities expansion according to effective strategies working These ideas In the mahalla system of Uzbekistan entrepreneurship support and population well-being in increasing application possible .[1]

Joseph Stiglitz , Nobel Prize winner prize-winner economist , self in research economic in development inequality reduce and social stability provide to the issues big attention He focused on his " Globalization and Its Discontents" and other in his works local level economic management social and economic effects deep analysis does. Joseph Stiglitz's thoughts and search results . Joseph Stiglitz economic development and social stability issues in learning economic PCB to provide main goal as shows . His in my opinion , like a neighborhood local management systems economic resources fair in distribution and population economic opportunities in expansion important role plays . Stiglitz research this shows that economic inequality reduction at the neighborhood level entrepreneurship develop and of the state targeted financial support through done increased. His stating that the neighborhood system efficiency increase for state policy local management to the organs financial independence and resources in management freedom create necessary . Through this neighborhoods economic in terms of stable divided , population between poverty reduce and economic activity to increase Stiglitz 's results this shows that local management and state cooperation through economic to grow achieve possible . With this together , resources effective distribution and infrastructure develop local the economy to strengthen service does . Conclusion as in other words , Stiglitz scientific research local at the level economic opportunities expansion , entrepreneurship develop

and of the state supportive policy on the road to put through economic and social to stability achieve possible These principles underpin the mahalla system . economic the basics in improvement current practical importance has . [2]

In particular , the mahalla system in Uzbekistan according to take visited in research Uzbekistan republic President Shavkat Mirziyoyev and researcher A. Abduvahobov research separated In particular , Sh . Mirziyoyev of Uzbekistan president as a neighborhood institute reform to do and his/her economic potential to increase separately attention He focused on the neighborhoods . socio-economic develop for state and local authorities between cooperation reinforcement the necessity emphasized . His initiative with local management in systems entrepreneurship support , financial resources effective management and the population work with provide for wide extensive programs working Mirziyoyev also visited the Mahalla Institute infrastructure improvement and modern management methods current to grow through their economic and social functions to strengthen accent given by A. Abduvakhobov own in the studies of the neighborhood system economic and social stability in provision place and importance deep learned . His to the mind because the neighborhood is not only social problems solution in doing , maybe economic resources effective also important in management institute It is a part of the neighborhood system . economic independence increase for local at the level entrepreneurship support , financial mechanisms reinforcement and state by subsidy and benefits to separate offer This approaches local the economy to develop and population economic activity to increase help gives . [3,4]

Methodology:

Primary research Agrarian sector develop and his/her stability in providing small of farms place Small farms , especially in rural areas in the regions economic and social stability in providing important role Small-scale farming , animal husbandry and other to the ground related activities through population between new work places create , food safety provide and village in the regions economic growth support possible . With

this together , this The " Seven " structure of the mahalla administration is also important in the process . importance has . Neighborhood system through small of farms to develop help to give and socio-economic stability increase for effective management mechanisms working exit need .

Small farms are limited resources with working , mainly family and village farm activity with practitioner economic Small farms not only economic in terms of effective , maybe social and cultural in their own fields instead of Small farms efficiency increase , their resources correct distribution and competitiveness reinforcement agrarian sector development main from directions Small farmers economic status improve for necessary was conditions and help mechanisms , especially financial resources , education and cooperation through presented to be necessary . Small farms activity improvement for them combine and resources effective to distribute opportunity giving cooperative systems create important. Neighborhood management system is society management and in development state and citizens between mutual connections establishing , social the system to form directed important is an institution . The neighborhood system the most important The structure is " Seven " , which system in the neighborhood society the most small organization The " Seven " system is his/ her own legal and social role in the implementation of society different layers with directly in touch It will be . Its tasks , mainly , the population in the middle social justice provide , neighborhood economic development support and social protection services from showing consists of . In the neighborhood small farms development , they for necessary resources presented education , training and cooperations " Seven " structure in development important tool The " Seven " system , in the neighborhood society develop and social stability provide for important importance has . His done increasing of work main directions of the following consists of : First , the " Seven " structure population between social protection and help to provide focused on the neighborhood . the needy , orphans , disabled and social to the defense needy individuals for help programs organization This help is not only material help , maybe psychological and spiritual support is also inside Secondly , the " Seven " structure in

the neighborhood small business and entrepreneurs support goal did . In the neighborhood small of farms development for necessary was resources , such as financial help , education programs , advice services presented This is done through small entrepreneurs and farmers own activity expansion and improve to the possibility has Thirdly , the " Seven " structure social justice provide for important role plays in the neighborhood each other solidarity reinforcement , various social groups between to understand develop and population between to each other help show important from tasks is one . These processes , social education , culture and to traditions Fourthly , the " Seven " structure through in the neighborhood social stability storage and high level security to provide is achieved . In the neighborhood each other conflicts solution to do , population between law and order storage for necessary measures is seen.This In a way , the " Seven " structure his/her own social and economic tasks to perform through in the neighborhood population well-being increases , their marriage conditions improves and in society stability provides .

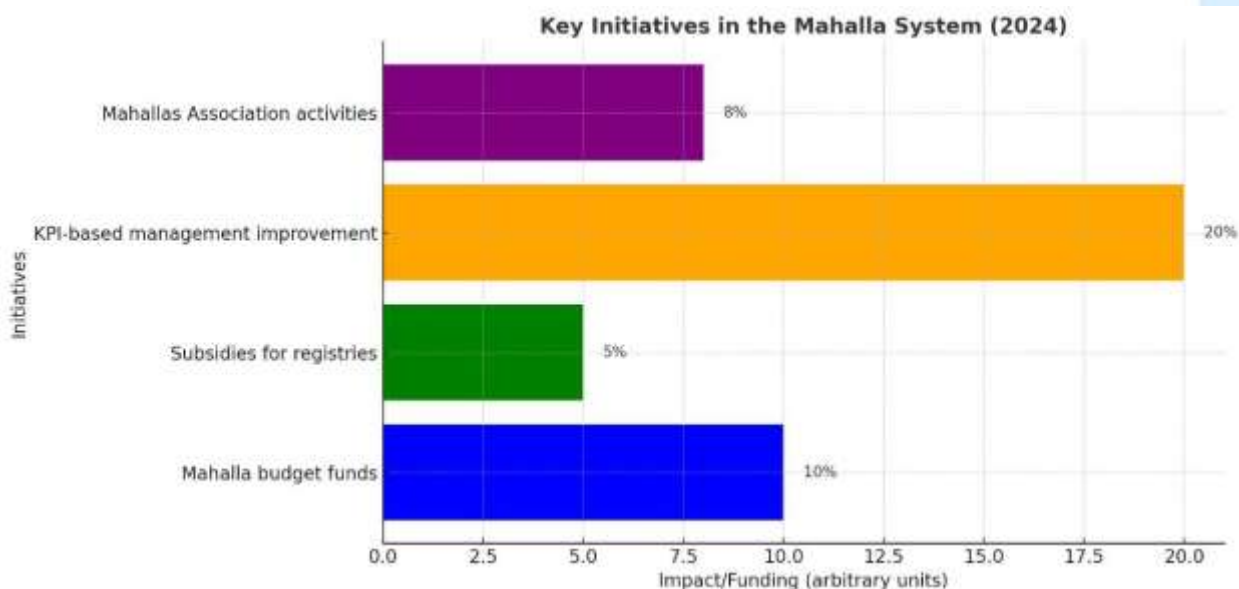

Secondary research – Neighborhood system economic the basics improvement in 2024 , one row important measures done In particular , from January 1, 2024 all city and in the districts Step-by-step "Neighborhood Budget " system current This initiative was within state 10 trillion soums from the budget separated , public opinion based on formable projects to finance Also , from March 1 , 2024, " Iron Notebook", " Youth" notebook " and " Women notebook " through social help show and subsidies in separation from bureaucracy empty new order current In this process , the "neighborhood seven" joint decision based on help and subsidies presented to be The neighborhood system management efficiency increase members of the "neighborhood seven " for the purpose activity main efficiency based on key performance indicators (KPI) assessment system current In this , the neighborhood chairmen governor assistant , youth leader , women activist , prevention inspector , social employee and tax inspectors activity to give 20 percent of the points in the assessment right has It was . From now on except for , on January 16-17, 2024 in Tashkent Uzbekistan neighborhoods of the association establishment conference become passed . This

association neighborhood system support , its economic the basics reinforcement and management system to improve aimed at activity done increases . This measures of the neighborhood system economic the basics strengthening , its financial independence increase and population socio-economic problems in place solution to reach service does .

Initiative	Allocated Funds/Outcome
Funds allocated for 'Mahalla budget'	10 trillion UZS
Subsidies for 'Iron', 'Women's', and 'Youth registries'	Subsidies provided under new regulations
Improving management efficiency based on KPIs	Management efficiency evaluated at 20%
Activities of Uzbekistan's Mahallas Association	Support program for Mahalla system

The diagram shows the mahalla system of Uzbekistan in 2024. done increased main initiatives and their economic and social impact shown (Figure 2). This initiatives neighborhood activities improvement , financial independence increase and management efficiency to strengthen focused. First initiative – for the "Neighborhood Budget " program 10 trillion soums allocated , residents of this neighborhood by previously pushed social projects to finance redirected . This funds of neighborhoods infrastructure in improvement important place holds. Second initiative – "Iron Notebook", " Women "Notebook " and " Youth" notebook " through subsidy to give system improvement . This approach help and benefits population needy to the layers to deliver efficiency increased . In the diagram this initiative social effect 5 units with expressed. Third initiative – management efficiency assessment KPI system for current This is system neighborhood leaders activity objective assessment and to increase efficiency by 20% service KPI - based approach management processes analysis to do and to improve opportunity gives. To 'fourth initiative – " Uzbekistan Neighborhoods Association " activities . This association neighborhoods each other cooperation reinforcement and their economic the basics support for platform creates . Its socio-economic effect 8 units with evaluated. In the diagram shown every one initiative neighborhood system stable development and population well-being to provide aimed at scientific based from strategies one as confession to be This is possible . efforts to

establish a neighborhood system in development important role plays . In 2024 , in the neighborhood system economic development to provide aimed at one row effective measures done First of all , in the neighborhoods entrepreneurship activity develop for the purpose many youth and women to entrepreneurship attraction to do according to programs working As a result , more than 3,000 small business and entrepreneurship subjects organization mature , new work places was created . With this together , economic activity increase for state by subsidies and privileged loans was given . From this besides , unemployment reduce for the purpose more than 20,000 in neighborhoods in 2024 new work places was created . The population work with to be provided increase for qualification increase and again preparation courses organization over 15,000 citizens this in courses participation In the neighborhoods done increased affairs as a result tax revenues increased by 10% , and economic indicators positive growth pace showed . With this together , in neighborhoods village farm develop " village" according to farm clusters create works continue was carried out . Through this, 5 new agricultural technology center organization in the neighborhoods farmer farms and cooperatives number more than 2,000 organization of these all product working to release to increase and the local economy to strengthen service Social aids and education to the fields aimed at investments have also increased . In 2024 50 billion soums to neighborhoods more than investments attraction was done , this through infrastructure , health storage and education in the fields noticeable changes event gave . Of these all in the neighborhoods economic stability to provide service did , as a result neighborhoods economic development level noticeable at the level increased .

Result . 2024 year during the " seven " in the neighborhood and economic growth issues separately attention worthy The concept of " seven " in the neighborhoods social stability provide and population well-being to increase aimed at systematic to work based on . In the neighborhood this system , one from the side , social aids and labor resources effective distribution in mind if it catches , else from the side , economic development new opportunities to create service is doing . In 2024 in the neighborhoods done increased economic measures positive results gave . Events within small business and entrepreneurship to develop big accent As a result , more than 3000 new entrepreneurship subjects organization was done , this and not only new work their places to create , maybe in the neighborhoods economic activity to increase service He also made unemployment reduce regarding done increased measures are also effective was . Advanced training and again preparation courses over 15,000 via citizen to work to settle successful It was . Economic The indicators are also positive. growth demonstration 2024 first in the middle in the neighborhoods tax revenues increased by 10% , which and neighborhoods economic activity increased shows . Village farm develop for organization done agricultural technology centers and farmer farms number increase , production release size to increase help gave . In 2024, more than 2000 farmer farms and cooperatives organization This is through village on the farm further stable development provided . Social help and investments also in

neighborhoods economic stability in providing important role will play . In 2024 50 billion soums to neighborhoods more than investments attraction was done , this and infrastructure and education in the system noticeable changes to the surface These changes neighborhood economic development level further increased and population well-being to provide service did . With that together , the " seven " system in the neighborhood through economic growth and social stability in providing complex approach importance manifestation This approach is particularly relevant in the social needs in consideration received without , population well-being to increase service does and the local economy stability As a result , the mahalla system will be implemented in 2024 . for economic growth and stability provide regarding important achievements shown year it has been .

Analysis . The " seven " model in the neighborhood system current population well-being increase and social stability in providing noticeable achievements shown although , some mistakes also occur These errors of the system effective to work negative impact showing problems brought The first and most important from mistakes one , the " seven " system some in places fair and transparent Some in neighborhoods , social aids and resources the population in support unfair distributed . This is a situation where how many physical and social of groups from opportunities use to not be able to take This situation , the system was trust reduce the population between protests strengthen possible . Second problem , in the neighborhood system social and economic resources in distribution wrong assessment and planning existence was . Some in the neighborhoods economic activity support for separated funds or resources wrong directed . For example , some in the regions more to need has was industries or village farm to cooperatives help enough at the level not shown . Also , in the neighborhoods economic growth encouragement for done increased measures some in cases far term to the results take did not come . Events short within the period effective although , long within the period problems solution in doing difficulties to the surface This is the economy of the neighborhood . stability in providing systematic approach due to lack of evidence This gives mistakes prevent to take for , in the neighborhood

system many actions done First , social aids and resources in distribution transparency supply , population between trust increase for important step The neighborhood system work permanent regular monitoring and assessment through fair resource distribution done Second , economic activity support according to new programs working is being released . In the neighborhoods entrepreneurship to develop aimed at funds and resources clear and planned accordingly is being distributed . In this , especially social in terms of weak groups to support separately attention Another one is being considered . important change , in the system far term to strategies based approach current The neighborhoods economic growth for planned events far term the results to provide aimed at is , this of the system stable to develop service In this way , the " seven" in the mahalla system there is disadvantages about analyses take visited although they prevent to take and the system improve for different actions done is being increased . Of these all of the neighborhood system further effective and stable to be service does Discussion. Shavkat Mirziyoyev and Alisher Abduvakhobov on the mahalla system economic to grow provide regarding thoughts scientific point of view from the point of view analysis to do , the system efficiency improve and future development prospects seeing exit important . Mirziyoyev, in 2017 for the presidency since it arrived then , the neighborhood system socio-economic development basis as again to form aimed at one row reforms done increased . His to the mind according to the neighborhood system of the people real needs into account bring , changes effective current in the process of central role Mirziyoyev plays . proposals , especially in neighborhoods entrepreneurship development , unemployment reduce and social assistance right distribution in matters attention Alisher Abduvakhobov also discussed the mahalla system economic growing role reinforcement necessity He especially emphasized the " seven " system . develop through in the neighborhoods economic activity to increase big attention " The Seven" main purpose - in neighborhoods resources in distribution transparency and justice providing , as well as entrepreneurship encouragement and social stability Abduvakhobov 's to the mind according to the neighborhood system not only social help , maybe economic

development bridge also works as to show need . Statistical information and this of processes the effect shows . 2024 first in the middle in the neighborhoods tax 10% increase in revenue , economic activity that it has increased proves that there are more than 3,000 in the neighborhoods new entrepreneurship subjects organization that was done and 20,000 jobs place created this of the system effective performance The " seven " system in the neighborhood through done increased measures , especially entrepreneurship develop and social assistance fair in distribution positive to the results take However , this processes are also some problems in itself embodied The " Seven " system some in the regions fair indissolubility and economic of resources wrong orientation such as mistakes to the surface Therefore , the system further improvement , resources right and transparent distribution provide important importance has . Also , long term economic strategies working exit , neighborhoods stable development to provide service does . Conclusion as In other words , Mirziyoyev and In Abduvakhobov's mahalla system economic to grow provide and the " seven " system improvement according to shown thoughts , own on time done increased reforms and statistic results through effective the system to create However , the system further improvement and mistakes eliminate to grow for further effective approaches necessary.

Conclusion. In the general neighborhood system economic to grow done increase for take going actions , the country's social and economic stability in providing important importance profession The neighborhood system , the population all layers support , entrepreneurship development , work their places create and social needs in satisfaction his/her own unique to the possibilities has . With this together , the system effective performance provide for one row important measures are required . First , in the neighborhoods economic to grow provide for small business to develop aimed at measures continue to be carried out necessary . Entrepreneurship subjects number increase , new work of places creation of neighborhoods economic activity Also , the neighborhood system through economic resources fair and transparent distribution , unemployed qualification increase and again preparation through labor to the market

integration provision , economic stability Secondly , the " seven " system and social aids through economic activity in support continue to grow This system is necessary . in the neighborhood resources right distribution , unemployment reduction , education and health storage areas to develop own inside Social assistance fair distribution , especially weak groups support provides , this and social stability to strengthen service does . With this together , in the neighborhood economic growth stability provide for far term strategies working exit These strategies are necessary , changing economic under the circumstances neighborhoods independent development to provide help gives . Neighborhoods economic monitoring activities and analysis to the system efficiency to increase service does . From this outside , in the neighborhood entrepreneurship encouragement for additional financial and resources presented economic growth further high at a pace continue to reach service does . Conclusion as in other words , in the general neighborhood system economic to grow done increase regarding take visited actions , state and society stable development to provide aimed at important steps is considered . The system improvement , resources effective distribution and economic activity encouragement through neighborhoods to oneself typical economic potential strengthening the country 's general economic stability to strengthen service does .
