Introduction: In today's modern life, English is not just a foreign language, however it is a common and global language. Nowadays, extensive part of people learn and use this language to communicate. English plays an indispensable role in business, science, and education. This article will discuss the significance of English of this time and why the young generation needs to learn it.

Main body: English is a means of international communication. All around the world, English is the main language for communication between countries. In some organizations, English is one of the official languages. These organizations include the UN, European Union, and NATO. English also plays an important role in tourism. It

helps tourists and local people to understand with each other. Nowadays, many young people want to study in foreign countries. Some of them are already studying abroad, others are getting full education in other countries. We can see such students both in our country and around the world. Learning English has become a must for these students. They need to acquire a knowledge of this language to study or work abroad. English is also essential and valuable in business and technology. Today, many big companies work in English. For example, Google, Amazon, Apple, and Microsoft use English in their activities. Furthermore, about 60 % part of contents are in English on social media. Most crucial documents and guides are written in English in programming and IT. Many young generation are learning English and getting certificates at different levels. This shows that English has a very important place in education and science. Most online learning platforms offer courses in English. These courses aid learners gain knowledge more easily. Coursera, Udemy, Khan Academy are justified examples for this. Learning this language also helps people learn other languages.

1. English in Media and Entertainment:

English also dominates the fields of media and entertainment. Most of the world's popular movies, TV shows, songs, and books are produced in English or translated into English. This gives English speakers wider access to global entertainment and knowledge.

2. English in Scientific Research: Over 80% of scientific journals and articles are published in English. Scientists and researchers around the world use English to share their findings. This unites the global academic community and allows for faster development of innovations.

3. English as a Career Booster:

Knowing English increases job opportunities. Many international companies require English proficiency, and employees with good English skills often have a higher chance of promotion. It also allows freelancers to work globally through platforms like Upwork, Fiverr, and Freelancer.

4. English and Technology:

Artificial intelligence (AI), machine learning, and computer programming are all fields where English is the main language. Even coding languages are based on English commands, which makes English knowledge a necessity for tech learners.

5. Challenges in Learning English:

While English is useful, learners often face challenges such as grammar complexity, pronunciation, and vocabulary size. However, thanks to modern tools like language apps (Duolingo, Memrise), online tutors, and YouTube lessons, these barriers are becoming easier to overcome.

A person who knows English well can think more than one language and adapt faster to new ones. For example, English has many words from Latin and French, consequently it becomes easier to learn French, Spanish or Italian. Also, English is part of the German language group, it helps when learning German or Swedish.

Conclusion: In today's world, English is not just a foreign language. It is the main tool in science, business, technology, and international relations. Acquiring English gives new opportunities to young people, opens shiny doors for their future, and help them being succeed. English is more than just a language—it is a powerful tool that connects the world. It influences communication, education, employment, and culture. Learning English is not only an advantage but a necessity for success in the globalized world. Therefore, it is important to promote English education while also valuing multilingualism and cultural diversity.
