FORMS OF WORKING WITH FAMILIES

TSPU named after Nizami, faculty of Preschool Education.
Authors: **N.M. Kayumova, M. Abdikarimova, D. Sobirova.**

Annotation: This article analyzes the forms of cooperation between educational institutions and families and their impact on children's upbringing and development. The importance of effective communication between educators and parents is highlighted, and strategies are recommended to enhance family participation in the educational process.

Keywords: Family-school collaboration, parental involvement, pedagogical communication, child development, educational support, interactive methods.

The Importance of Working with Families: The family plays a crucial role in the intellectual and social development of children. Collaboration between parents and educators enhances children's interest in the learning process, improves their academic performance, and positively influences their personal development. The stronger the connection between school and family, the higher the quality of education.

Key benefits of family-school collaboration:

• **Improves academic performance** – Active parental involvement in the learning process increases children's motivation and engagement.

• **Supports children's psychological and social development** – Cooperation between parents and educators helps children adapt successfully to their social environment.

• **Enhances the effectiveness of the educational process** – Regular communication between parents and teachers contributes to better knowledge acquisition and overall child development.

This collaboration helps children shape their future successfully.

Forms of Working with Families:

Various methods and approaches can be used to establish effective cooperation between school and family. Each of them contributes to children's academic success, social adaptation, and psychological development. Parents should regularly communicate with their children and engage them in the educational process. Such interactions boost children's self-confidence and increase their interest in learning.

1. **Regular communication** – Organizing meetings, consultations, and discussions between parents and teachers to monitor children's development.
2. **Seminars and training for parents** – Sessions on child psychology, teaching methods, and parenting strategies.

3. **Home visits** – Teachers visiting students' homes to understand their living conditions and apply an individualized approach.
4. **Parental involvement in cultural and educational events** – Active participation of parents in school activities boosts children's self-esteem.
5. **Use of interactive technologies** – Online platforms, mobile applications, and remote communication tools to strengthen parent-teacher connections.

Conclusion:

Effective collaboration between families and educational institutions directly influences children's success in the learning process. When parents actively participate, children experience not only intellectual growth but also social and emotional development. Therefore, strengthening the role of families in education is one of the key tasks of the modern education system.
