Keywords: Teaching a Foreign Language ,Communicative Method ,Modern Pedagogy ,Education Abroad ,difficulties of learning a Foreign Language ,Technologies.

INTRODUCTION

These days, English Language is spreading whole of the world and it considers that one of main communication systems. In Globalization situation role of English Language is growing and more and more countries are entering this education system. Also ,Uzbekistan is paying attention to modernization of education system. Many different pedagogical views and methods are used for effective teaching a Foreign Language . Beside ,traditional methods ,interactive ways are available in modern technology strategies. In this article,we discuss that, the best effective ways and approaches of teaching English Language and difficulties which, students are facing, eliminate these problems.

METHODS AND ANALYSIS

There are several methods of teaching English language .There are three types of methods;

- Grammatical and translated method ,
- Audio method
- Communicative ways

In grammatical and translated method ,grammatic rules and sentences will given and translated to your own language .This way is related to giving a theoritical knowledge.

Second method which Audio method is depend on pronunciation and listening skills of students .During the lesson, they need to get into communication.

Next communicative ways are useful on these times and it consist of teaching communication system. Thats why ,students can learn this system as suitable for real life.

Nowadays ,Digital technologies are being easy. You can learn independently by Online platforms and apps-BBC Learning English , Duoingo . Artifical intelligence-students can have an opportunity to communication in an interactive environment .However, English language has several difficulties ,such as,grammatic ,pronunciation ,phonetic and vocabulary difficulties and frightened od communication.

CONCLUSION

It is important that, effective teaching ways and traditional methods .These days ,communicative ways ,using of technology and interactive lesson structures is improving .Also ,using of individual approach is speeding .Artificial intelligence will use widely to teaching in the future .Thats why,the teachers need to have a good qualification.
